POLISHING LATHE

LATHE FOR GOLDSMITHS

BORING

LATHE FOR RUBBER AND COMPOUNDS

LATHE FOR RAILWAY AXLES

STRENGTHS

- Design, development, construction of components, assembly, testing and training
- Customisation
- Direct «in-house» assistance
- Certified and compliant production

DISTINGUISHING FEATURES

- Attention to every component and production step of the machine: mechanical, electrical, electronic and software
- 400+ options and variants that can be installed on the machines
- Highly specialised in-house team for ordinary maintenance and extraordinary activities
- UNI EN ISO 9001

CUSTOMER BENEFITS

- Highest quality and reliability
- Satisfaction of the most varied production needs
- Troubleshooting in very fast times
- Partner guaranteed by positive assessments and due diligence within the supply chain

- MCM has a heterogeneous clientele, from **large multinationals** to **small specialized mechanical workshops**, operating within different sectors such as **aerospace, marine, defence, oil, rubber, hydraulic, automotive, steelworks, railway** and many others
- The **configuration** of the machine is **agreed** with the **customer** based on the **specific production needs**, creating multifunctional machines that can combine **turning**, controlled axis or continuous **milling**, internal and external **grinding, drilling** and **deep boring**
